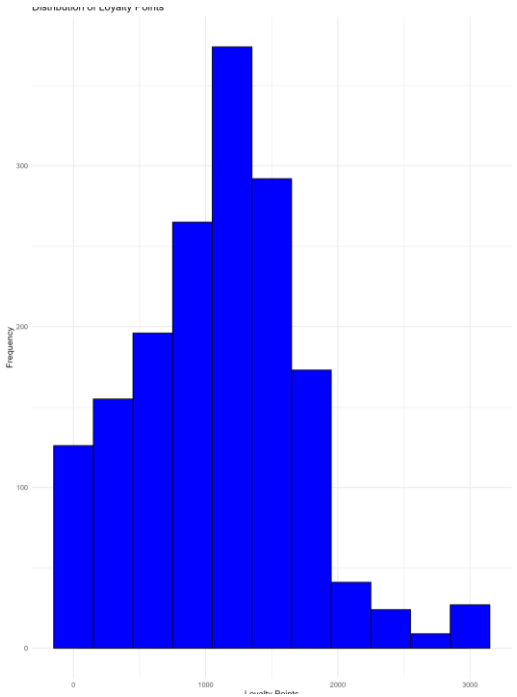
Business Context: Understanding Loyalty to Drive Growth

- Enhance sales and engagement with insights from loyalty data.
- Understand the key drivers of customer loyalty.
- Predict future loyalty points to optimise marketing campaigns.
- Identify high-value customer segments for targeted marketing efforts.

Data Overview: Exploring Customer Insights

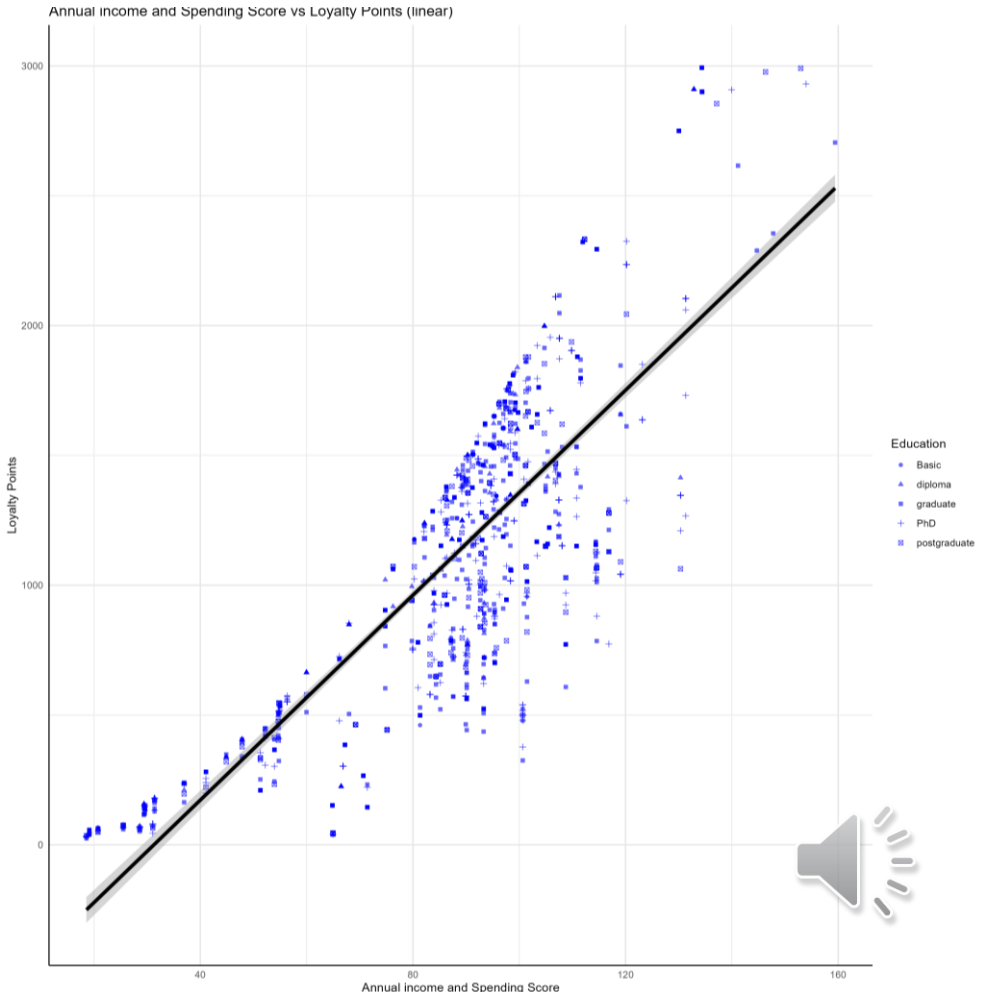


- Data Source: Customer demographics, income, spending score, and reviews.
- Key Variables:Gender, Age, Annual Income, Spending Score and Loyalty Points
- The mood of the reviews & summaries

Spending Drives Loyalty

Key Finding 1:

- Higher income and spending score correlate with increased loyalty points.
- Target marketing efforts towards high-spending customer segments.



Uncovering Customer Segments

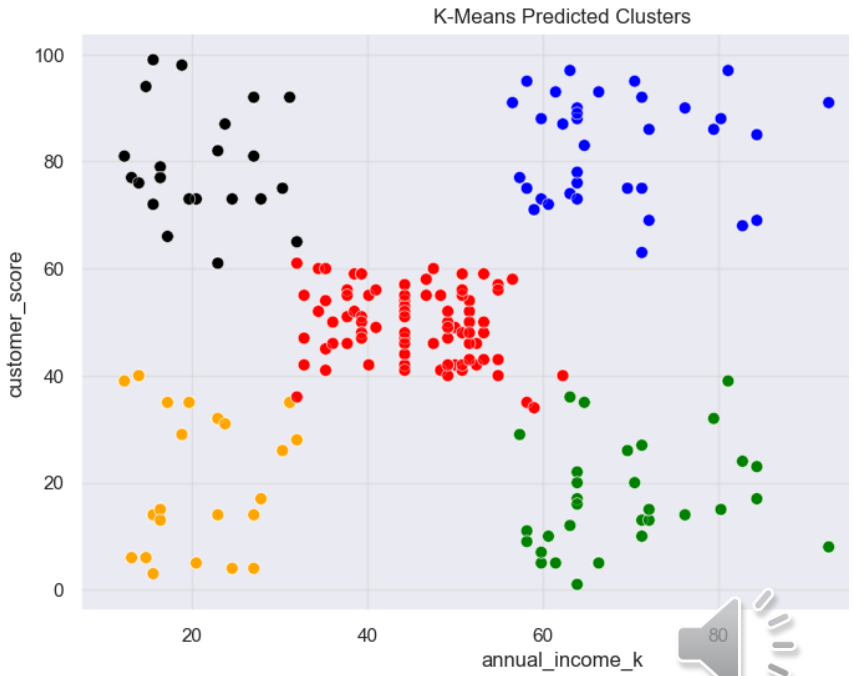
Key Finding 2

Customer Segmentation

Method: Cluster Analysis (K-means)

Insight: 5 distinct customer groups based on income and spending.

- Tailor campaigns for each cluster.
- Target high-value customers for loyalty rewards.



Customer Sentiment

Key Finding 3:

- Method: NLP (Sentiment Analysis)
- Insight: Positive reviews: "fun", "play", "value"
- Negative reviews: price, glitches
- Business Message: Address product feedback to improve customer satisfaction.

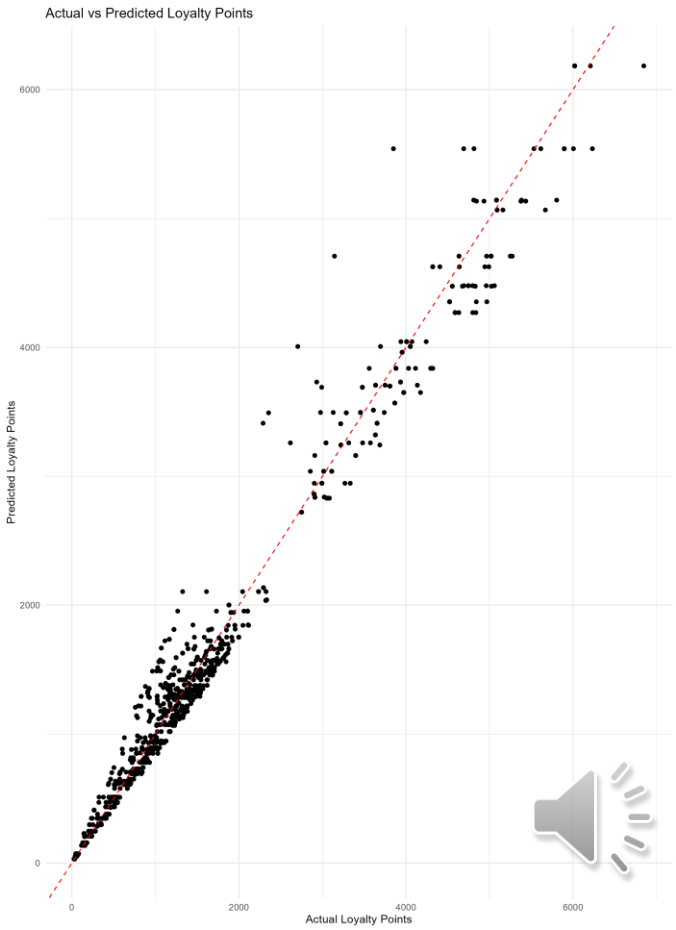
Predicting Future Loyalty Points with Regression

Key Finding 4: Predictive Modelling

- Simple Regression Model
- Spending & Income are Strong Predictors
- Model Accurately Predicts Future Loyalty Points
- Visual: Actual vs. Predicted Points
- Business Use: Design Tiered Rewards Programs



Key Takeaways and Strategic Recommendations

- Target high-income, high-spending segments.
- Implement tiered rewards based on predicted loyalty.
- Address negative feedback to improve satisfaction.
- Collect additional data to enhance future predictions.

Key Takeaways and Actionable Insights

Key Takeaways:

- High spending drives loyalty.
- Predictive models offer actionable insights.
- Segmentation allows targeted strategies.

Next Steps:

- Implement targeted marketing and loyalty strategies.
